Understand Business Impactful Cyber Risk

Identify Threats & Risks

Our Cyber Intelligence Driven Risk (CI-DR) framework considers 5 Domains, and 26 Capabilities during Risk Assessments. These are designed to identify industry and business relevant risks that exceed compliance with all industry and regulatory requirements.

Understand Business Impact

Cybersecurity & information risk experts conduct an analysis using our CI-DR Framework to evaluate threats and risk to the achievement of your business objectives.

Reduce Risk Susceptibility

Seasoned experts develop a business specific risk management & treatment strategy that forms the basis for helping your business determine how to handle cybersecurity and information risks.

*Designed to align & exceed requirements for
common frameworks, regulation and privacy laws.*
